## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The prior arts fail to teach or fairly suggest a method for testing shorts in a flash memory comprising programming a plurality of memory cells with a stress pattern of alternating logic states by selectively coupling odd local bit lines to odd global bit lines, selectively coupling even local bit lines to even global bit lines, and monitoring the global bit lines for a logic state pattern in response to such programming, and comparing the logic state pattern with a predetermined test pattern, and finally locating any local and global bit line shorts in response to results from such comparing step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
